Research Papers

Hydrogeochemistry of deep formation brines in the central Sichuan Basin, China
X. Zhou and C. Li (Beijing, People's Republic of China) 1
Steady seepage near an impermeable obstacle
A.R. Kacimov and A.N. Nicolaev (Kazan, Russia) 17
Hydro-behaviour of Middle Eastern desert soils
F.M. Shaqour (Irbid, Jordan) and H.A. Al-Sanad (Kuwait) 41
Formation of borders in porous media during evaporation and their influence on permeability
L.C. Goldenberg, A. Melloul (Jerusalem, Israel) and I. Hutcheon (Calgary, Alb., Canada) 53
A new method of characterizing fissured media by pumping tests with observation wells
L.M. Bangoy, P. Bidaux, C. Drogue, R. Plégat and S. Pistre (Montpellier, France) 77
Potential use of time domain reflectometry for measuring water content in rock
S.L. Hokett, J.B. Chapman and C.E. Russell (Las Vegas, NV, USA) 89
A rainfall–runoff model for small watersheds
G.-T. Wang, V.P. Singh and F.X. Yu (Baton Rouge, LA, USA) 97
Night-time evapotranspiration vs. daytime and 24 h evapotranspiration
E. Malek (Logan, UT, USA) 119
Intra- and inter-storm ^{18}O trends for selected rainstorms in Pennsylvania
H.B. Pionke and D.R. DeWalle (University Park, PA, USA) 131
Why can the weighting parameter of the Muskingum channel routing method be negative?
J. Szilagyi (Budapest, Hungary) 145
FEM modelling to investigate seepage losses from the lined Nadiad branch canal, India
A.K. Rastogi and B. Prasad (Bombay, India) 153
Composition and history of ground water in the western Nile Delta
W. Geirnaert and M.P. Laeven (Amsterdam, Netherlands) 169
A laboratory study of the biodegradation of an alcohol ethoxylate surfactant by native soil microbes
C.C. Ang and A.S. Abdul (Warren, MI, USA) 191
Hydraulic calculation of groundwater flow velocity and age: examination of the basic premises
E. Mazor and R. Nativ (Rehovot, Israel) 211
Sampling variance of normalized GEV/PWM quantile estimators and a regional homogeneity test
L.-H. Lu (Taipei, Taiwan) and J.R. Stedinger (Ithaca, NY, USA) 223
Variance of two- and three-parameter GEV/PWM quantile estimators: formulae, confidence intervals, and a comparison
L.-H. Lu (Taipei, Taiwan) and J.R. Stedinger (Ithaca, NY, USA) 247
Environmental tritium and ^{18}O applied in a hydrological study of the Wairau Plain and its contributing mountain catchments, Marlborough, New Zealand
C.B. Taylor, L.J. Brown (Lower Hutt, New Zealand), J.J. Cunliffe and P.W. Davidson (Blenheim, New Zealand) 269

Announcement 321

Vol. 138 Nos. 3–4 **October 1992**

Research Papers

The salinization mechanism of Lake Kinneret
E. Simon and F. Mero (Tel Aviv, Israel) 327
The simulation of chloride inflows into Lake Kinneret
F. Mero and E. Simon (Tel Aviv, Israel) 345
Automated approaches for regional runoff mapping in the northeastern United States
G.D. Bishop and M. Robbins Church (Corvallis, OR, USA) 361
Soil water prediction on the Konza Prairie by microwave remote sensing and topographic attributes
A.R. Ladson (Wangaratta, Vic., Australia) and I.D. Moore (Canberra, A.C.T., Australia) . 385
Modelling hydrological processes and aluminium leaching in an acid soil at Llyn Brianne, Mid-Wales
C. Soulsby (Newcastle-upon-Tyne, UK) and B. Reynolds (Bangor, UK) 409
Hydrological controls on acid runoff generation in an afforested headwater catchment at Llyn Brianne, Mid-Wales
C. Soulsby (Newcastle-upon-Tyne, UK) 431
Interception loss, throughfall and stemflow in a maritime pine stand. I. Variability of throughfall and stemflow beneath the pine canopy
D. Loustau, F. El Hadj Moussa (Gazinet, France), P. Berbigier (Villenave d'ornon, France) and A. Granier (Champenoux, France) 449
Interception loss, throughfall and stemflow in a maritime pine stand. II. An application of Gash's analytical model of interception
D. Loustau (Gazinet, France), P. Berbigier (Villenave d'ornon, France) and A. Granier (Champenoux, France) 469
Regional flood frequency analysis in arid and semi-arid areas
F.A.K. Farquharson, J.B. Meigh (Wallingford, UK) and J.V. Sutcliffe (Reading, UK) . . . 487
Estimation of unsaturated hydraulic conductivity from inflow data
K. Zayani, N. Ennabli (Tunis, Tunisia) and G. Vachaud (Grenoble, France) 503
Predicting the regional occurrence of acid surface waters in Scotland using an approach based on geology, soils and land use
S.J. Langan and M.J. Wilson (Aberdeen, UK) 515
Modelling bedload transport events using an inhomogeneous gamma process
M.A. Hurley (Windermere, UK) 529
An aggregation–disaggregation approach for hydrologic time series modelling
G.-F. Lin and F.-C. Lee (Taipei, Taiwan) 543
Hydrogeochemistry of Maine seepage lakes and related groundwaters
R.E. Stauffer and B.D. Wittchen (Orono, ME, USA) 559
A note on areally-averaged evaporation and the value of the effective surface conductance
A.J. Dolman (Wallingford, UK) 583
Falling-head ponded infiltration with evaporation
J.R. Philip (Canberra, A.C.T., Australia) 591
Groundwater flow patterns in the vicinity of underground openings in unsaturated rock — comment
P.W. Ford, J.R. Philip and J.H. Knight (Canberra, A.C.T., Australia) 599
Reply to the preceding comments by P.W. Ford, J.R. Philip and J.H. Knight on 'Groundwater flow patterns in the vicinity of underground openings in unsaturated rock'
S.D. Vincent, R.E. Williams and G.L. Bloomsburg (Moscow, ID, USA) 603
